

Request

GET /expressions/1

checks the
block and fails

incorrect

✓ correct action

x wrong route (doesn't have /1)

```
app.get('/expressions', (req, res, next) => {  
  res.send(getAllExpressions());  
});
```

checks the
block and passes

correct

✓ correct action

✓ correct route (has /1)

```
app.get('/expressions/:id', (req, res, next) => {  
  const expression = getExpressionById(req.params.id);  
  res.send(expression);  
});
```
