

Request

PUT /expressions/1?name=happy

checks the
block and fails

x wrong action

✓ correct route (has /1)

incorrect

```
app.get('/expressions/:id', (req, res, next) => {  
  const expression = getExpressionById(req.params.id);  
  res.send(expression);  
});
```

checks the
block and passes

✓ correct action

✓ correct route (has /1)

correct

```
app.put('/expressions/:id', (req, res, next) => {  
  const expression = getExpressionById(req.params.id);  
  const updatedExpression = updateExpression(expression, req.query);  
  res.send(updatedExpression);  
});
```
